SUPPLEMENT TO  
REPORT NO. 

THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES, WITHIN THE MEANING OF TITLE 18, SECTIONS 793 AND 794, OF THE U.S. CODE, AS AMENDED. ITS TRANSMISSION OR REVELATION OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. THE REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

25X1X

1. There were no serious plant disease problems in Czechoslovakia. Efforts were being made to protect Czech wheat. Although the Czechs had to import grain, they had exported good wheat for planting in the USSR.

25X1X

2. The representative of the Ministry of Agriculture in each district governing council regulated plant and veterinary affairs. There were phytopathological control stations in Brno, Bratislava, Kosice, and Koselka (sic), and these were subordinate to the Ministry of Agriculture, but I am not sure whether or not the veterinary service was under the Agriculture Ministry.

3. Although there were only two or three qualified phytopathologists in Czechoslovakia, the shortage was not a problem because the farmers themselves exercised considerable individual care of their crops. The phytopathologists were assisted by veterinarian wherever possible. The Phytopathological Research Institute of the Agricultural Faculty of the Technical University in Prague was formerly directed by Prof Peklo, who was replaced by Dr Smolak. Smolak had been director of the two-year gardeners' school, a middle school in Prague-Ruzyne.
